

# CyMath

(1) Tutor or help recruit a math-loving tutor (volunteer or paid). (2) Help recruit grade 3-10 students needing math help. (3) Fund or help find funding to support CyMath coordination and tutoring.

## What is it?

Math-loving STEM graduate & undergrad student volunteers and paid Education majors tutor kids in grades 3-10. Goal: fix the math learning gap while it's still small → get kids ready for high school and (STEM) college success! We use [ALEKS.com](https://www.aleks.com) or math workbooks or worksheets.

## It really works!

**2 of 6 third grade students who started in Fall 2023 have already gone up from below to way-above grade level and at-grade level!**  
Many newer kids showing slow but steady progress!

## Why Grad Tutors?

Improve teaching & communication skills, understand the modern US math education system and pace college teaching; find community and mentors (many Math and ECE professors and grad students)

## Get Involved!

CyMath has opportunities for in-person or online tutors. Takes only one or two hours a week!
